RESPONSE

This is responsive to the Official Action of August 19, 2005. Claims 1-13 remain active in the application. Of these claims 1, 6 and 8 are rejected as allegedly being anticipated by the primary reference while the remaining claims are rejected as lacking patentability over the disclosures of the primary reference taken in combination with secondary references. Compare item 1 with items 2-5.

The discussion in the Official Action seems to focus primarily on Figure 2 of the primary reference. Before addressing these five prior art-based rejections, it is important to again summarize the objective of the present invention, the problems to which it is directed, and the results obtained.

The object of the present invention is to provide a method for efficiently producing a substrate blank as an intermediate for a substrate by a direct press method, in which the occurrence of undulation is prevented and the substrate blank is produced with high accuracy (specification, page 2, line 34 to page 3, line 2). In the production of a substrate blank by a direct
